Temperature Controller CD101 Set-Up for Sous Vide
Press and hold the SET button for 3 seconds until the Parameter Settings starts, then cycle through them with the SET button and set them as shown below. Use the R/S (Run/Stop) button to select the digit from right to left and the Up and Down buttons to set the value.
To set the values below LCK you must first set LCK to 1000 and press SET to confirm. Then press SET and R/S together for 3 seconds, the screen will show Cod, set Cod to 0000 and press SET to cycle through SL1 to oH. Press SET to confirm and you are done.

Display	Function	Factory Setting	Sous Vide Setting
ARU	Auto-tuning: Learns to keep temp within parameters with your setup. Must be on (1).	0	1
